

Profile Of Tezacaftor/Ivacaftor Combination And Its Potential In The Treatment Of Cystic Fibrosis [Erratum]

Shiferaw D, Faruqi S. *Ther Clin Risk Manag.* 2019;15:1029–1040.

Following a review of our paper post-publication, we found an error had been introduced during the typesetting process.

On page 1029, the first sentence of the introduction section reads as “Cystic fibrosis (CF) is a life-threatening genetic disease that affects approximately ct 380,000 people worldwide.¹” This should read as “Cystic fibrosis (CF) is a life-threatening genetic disease that affects approximately 80,000 people worldwide.¹”

Publish your work in this journal

Therapeutics and Clinical Risk Management is an international, peer-reviewed journal of clinical therapeutics and risk management, focusing on concise rapid reporting of clinical studies in all therapeutic areas, outcomes, safety, and programs for the effective, safe, and sustained use of medicines. This journal is indexed on PubMed Central, CAS,

EMBASE, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
