

Erratum

Aninwene II GE, Yao C, Webster TJ. Enhanced osteoblast adhesion to drug-coated anodized nanotubular titanium surfaces. *Int J Nanomedicine*. 2008;3(2):257–264.

There is a mistake in the **Drug coating** section of the Materials and methods. In the paper it is written as follows:

“For simple physical adsorption, 120 μ L of either penicillin/streptomycin (Hyclone, Logan, UT, USA; 5 μ g/mL) or dexamethasone (Sigma, St. Louis, MO, USA; 5 μ g/mL) solutions were placed onto each unanodized or anodized titanium for 3 days at room temperature.”

But the text should be written as:

“For simple physical adsorption, 120 μ L of either penicillin/streptomycin (Hyclone, Logan, UT, USA; **6.25 mg penicillin and 10 mg streptomycin per mL**) or dexamethasone (Sigma, St. Louis, MO, USA; 5 mg/mL) solutions were placed onto each unanodized or anodized titanium for 3 days at room temperature.”

International Journal of Nanomedicine

Dovepress

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
