

The impact of *ABCB1* (rs1045642 and rs4148738) and *CES1* (rs2244613) gene polymorphisms on dabigatran equilibrium peak concentration in patients after total knee arthroplasty [Corrigendum]

Sychev DA, Levanov AN, Shelekhova TV, Bochkov PO, Denisenko NP, Ryzhikova KA, Mirzaev KB, Grishina EA, Gavrillov MA, Ramenskaya GV, Kozlov AV, Bogoslovsky T. *Pharmacogenomics Pers Med.* 2018;11:127–137.

In this paper, the CC genotypes of *CES1* (rs2244613) were misrepresented as AA genotypes. For the correct interpretation of the results of this research study, the “AA genotypes” should be corrected to “CC genotypes”. *CES1* (rs2244613) genotypes were interpreted incorrectly due to misleading instruction in the RT-PCR commercial kit. Accordingly, in this paper “AA homozygous” should be replaced by “CC homozygous”.

Pharmacogenomics and Personalized Medicine

Publish your work in this journal

Pharmacogenomics and Personalized Medicine is an international, peer-reviewed, open access journal characterizing the influence of genotype on pharmacology leading to the development of personalized treatment programs and individualized drug selection for improved safety, efficacy and sustainability. This journal is indexed on the American Chemical

Society's Chemical Abstracts Service (CAS). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
