

The Role and Mechanism of SIPR5 in Colon Cancer [Retraction]

Zhou H, Yin X, Bai F, Liu W, Jiang S, Zhao J. *Cancer Manag Res.* 2020;12:4759—4775.

The Editor-in-chief and Publisher of *Cancer Management and Research* wish to retract the published article. Concerns were raised of alleged image duplication in Figure 10A Migration panel SIPR5 OE-/IDO1 shRNA- and Figure 10B Invasion panel SIPR5 OE+/IDO1 shRNA+. The authors responded to our queries but were unable to provide a satisfactory explanation for the alleged duplication or provide adequate raw data for the study

described. It was determined the findings of the study could not be supported and the decision was made to retract the article. The authors agree with this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient.

The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
