

RETRACTION

Long Non-Coding RNA BLACAT1 Induces Tamoxifen Resistance in Human Breast Cancer by Regulating miR-503/Bcl-2 Axis [Retraction]

Qu R, Hu C, Tang Y, Yu Q, Shi G. *Cancer Manag Res.* 2020;12:1771–1777.

The Editor-in-chief and Publisher of *Cancer Management and Research* wish to retract the published article. Concerns were raised regarding discrepancies in the flow cytometry images used in Figures 1B, 2C and 4E. The authors did respond to our queries but were unable to provide the raw data for their flow cytometry results and could not provide raw data for other aspects of their study,

including the western blots. The findings of the study could not be validated and the decision was made to retract the article. The authors agree with this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.
