- Figure 2C

At the authors request, the Editor and Publisher of *Cancer Management and Research* wish to retract the published article. The authors have informed the journal that parts of the article were copied directly from the thesis of another researcher without their knowledge. The subject of the thesis was the regulation of *CAMK2N1* gene expression and shared no relationship to the study described in the published article. The authors altered the information taken from the thesis and added it to the results presented in the article. The specific parts of the article taken from thesis were:

The authors accept data falsification is a serious issue and is in breach of the journal's editorial polices and requested to retract the article. The authors wish to apologise for this action.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient.

The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
