

## Lung penetration and patient adherence considerations in the management of asthma: role of extra-fine formulations [Corrigendum]

Scichilone N, Spatafora M, Battaglia S, Arrigo R, Benfante A, Bellia V. *J Asthma Allergy*. 2013;6:11–21.

On page 15, the note in the legend for Figure 3 was incorrectly listed as “The improvement is greater in the extra-fine beclomethasone-formoterol combination group than in the non-extra-fine fluticasone propionate-formoterol group”. The correct sentence is “The improvement is greater in the extra-fine beclomethasone-formoterol combination group than in the non-extra-fine fluticasone propionate-salmeterol group”.

On page 16, there is a missing note for Figure 4.

**Note:** Data on file. (Chiesi Farmaceutici S.p.A, 2012)

### Journal of Asthma and Allergy

#### Publish your work in this journal

The Journal of Asthma and Allergy is an international, peer-reviewed open-access journal publishing original research, reports, editorials and commentaries on the following topics: Asthma; Pulmonary physiology; Asthma related clinical health; Clinical immunology and the immunological basis of disease; Pharmacological interventions and

new therapies. Issues of patient safety and quality of care will also be considered. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
