

RETRACTION

Tracheal intubation with the rigid tube for laryngoscopy – a new method [Retraction]

Marchis IF, Radeanu D, Cosgarea M. *Ther Clin Risk Manage*. 2019;15:309–313.

The Editor-in-Chief and Publisher of *Therapeutics and Clinical Risk Management* wish to retract the published article.

Concerns were raised to the Editor-in-Chief regarding the level of similarity between the published article and another article titled The Rigid Tube of Laryngoscopy – a New Intubation Technique by the same authors in the *Proceedings of National ENT, Head and Neck Surgery Conference* (17–20 May 2017, Sibiu, Romania).

Following an investigation, it was found the level of similarity between the two articles was unacceptable and the authors had failed to notify *Therapeutics and Clinical*

Risk Management of the previous publication. It was determined by the Editor-in-Chief the authors had not modified the article submitted to *Therapeutics and Clinical Risk Management* sufficiently enough for it to be considered new information and it was found to be a redundant publication.

The authors wish to apologize for this error.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Therapeutics and Clinical Risk Management

Dovepress

Publish your work in this journal

Therapeutics and Clinical Risk Management is an international, peer-reviewed journal of clinical therapeutics and risk management, focusing on concise rapid reporting of clinical studies in all therapeutic areas, outcomes, safety, and programs for the effective, safe, and sustained use of medicines. This journal is indexed on PubMed Central, CAS,

EMBASE, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
