

Orcinol Glucoside Facilitates the Shift of MSC Fate to Osteoblast and Prevents Adipogenesis via Wnt/ β -Catenin Signaling Pathway [Retraction]

Zhou X, Liu Z, Huang B, et al. *Drug Des Devel Ther.* 2019;13:2703–2713.

The Editor and Publisher of *Drug Design, Development and Therapy* wish to retract the published article. Concerns were raised regarding the alleged duplication of Oil Red O images in Figures 4 and Figure 6. Specifically,

- Figure 4C, Oil Red O, Ctrl, appears to have been duplicated with the same image for Figure 6D, Oil Red O, OG+ICG-001.

The authors cooperated with the investigation and provided data associated with the study. However, despite the authors' assistance, it was still not clear how the images came to be duplicated, and, as we cannot verify the validity of the published work, we are therefore retracting the article and the authors agree with this decision.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
