Dear editor

Thank you for your constructive feedback on our study. Your comments touched upon several important points that will be crucial in determining the direction of our future research.

We do not anticipate significant differences in the fundus photograph interpretation skills among ophthalmologists across facilities. However, we hypothesize that the skills of non-ophthalmologists affiliated with health checkup facilities may vary considerably between institutions. Therefore, additional verification across multiple health checkup facilities is deemed important. This verification could reveal efficient methods for non-ophthalmologists to learn fundus image interpretation.

Further additional verification is required to illuminate the challenges inherent in glaucoma screening. Beyond identifying these challenges, we remain dedicated to improving glaucoma diagnostic accuracy.

Publish your work in this journal

Clinical Ophthalmology is an international, peer-reviewed journal covering all subspecialties within ophthalmology. Key topics include: Optometry; Visual science; Pharmacology and drug therapy in eye diseases; Basic Sciences; Primary and Secondary eye care; Patient Safety and Quality of Care Improvements. This journal is indexed on PubMed Central and CAS, and is the official journal of The Society of Clinical Ophthalmology (SCO). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
